

Cornettes de Bise (2432 m)

Difficult/Difficile hike - 20 km and 1400 m elevation gain

Sunday, July 7, 2019

- **Hike:** We start from Miex and walk up to Lac de Taney, then continue along the valley to the base of Cornettes de Bise. We then scramble on the steep path to reach the summit with fantastic views of the lake and Alps. At least 8 hours of walking, plus lunch and breaks. This is a difficult hike with about 1400 m of elevation gain from the starting point to the summit - only for fit and sporty hikers without vertigo. We will stay on good trails but there will be short exposed or steep passages so good balance is required.
